ClaimAid rolls out VEHO (Variable Employee Healthcare Options)

ClaimAid Consulting Corporation has always believed meeting patients at the hospitals we serve, as the best way to assist them in enrolling for state and/or federal healthcare coverage programs for which they qualify.

In considering other ways to reach the uninsured, we are now offering organizations and their HR Directors (who have a significant amount of **part time** or **variable staff**) that same service.

Many industries have part-time employees that don't qualify for healthcare benefits. Healthcare Providers are no different. By contacting ClaimAid, those employees can now learn about coverage options and receive assistance with enrollment.

We are now offering our **best in class** Uninsured Enrollment services to any healthcare provider with underserved part-time employees and volunteers. It offers enrollment assistance to anyone that doesn't qualify for their employer's sponsored Healthcare Insurance.

This group of employees has a higher rate of absenteeism and turn over. Much of this can be attributed to the lack of coverage or access to affordable healthcare.

VEHO (Variable Employee Healthcare Options) is performed at no cost to the Employee. ClaimAid funds this service by charging the hospital a nominal per employee, per month fee. We serve as a resource for all your part-time staff; from aides, to lunch workers, to security staff, to valets and their families.

This service will help your variable employees stay healthier, decrease turnover and lower absenteeism.
