

HCF-16TX Service Provider Questions & Answers

Answers provided in **red**.

1. Please confirm if the RFP is “all” point to point excluding one DIA for the CHCSCT WIC Center 229 Saint George St. Gonzales, TX 78629 location. That is the only site we understand to need a DIA. Is that correct?

Only HCP# 135860 - CHCSCT WIC Center is requesting a point-to-point AND a DIA connection. All other sites are requesting point-to-point.

2. Is the preference for the circuit to be connected to a separate location? As we have the Site Name and Address on the left, and on the right-hand side of the chart shows the connections, it is proposing to have the Fiber connected to a separate location. Screenshot Below –

HCP#	Site Name & Address	Minimum Desired Service & Any Connections
135860	CHCSCT WIC Center 229 Saint George St. Gonzales, TX 78629	200M Internet AND dedicated fiber connected to 228 Saint George St Gonzales, TX 78629
72190	Healing Hands Ministries Dallas (HHM) 8515 Greenville Avenue, Suite N108 Dallas, TX 75243	500Mbps fiber Connected to 5750 Pineland Dr. Dallas, TX 75231
135774	HHM Health Arlington 3201 Matlock Road, Suite 430 Arlington, TX 76015	500Mbps fiber Connected to 5750 Pineland Dr. Dallas, TX 75231

Yes. The HCP site in the column on the left is the primary location. The site in the column on the right is the site they want fiber to connect back to.

3. A follow up to the question above, If connected to two different locations, are you requiring an additional circuit at the other location to pair with the main site address? (Example, Main Site Address for Service: 229 Saint George Street, Gonzales, TX 78629 – Connected to 228 Saint George Street Gonzales, TX 78629)

No. The only circuit requesting pricing is for the primary site in the left-hand column. The only exception would be if a separate circuit or service is REQUIRED as a prerequisite for the requested service to be functional. There is a column for prerequisite costs on Attachment B.
